

MaxiLub

For sheet metal lubrication.

- Handles most greases and oils – ***broad area of application***
- Extremely resistant to dirt – ***minimal maintenance***
- Variable lubricant quantity – ***minimizes oil consumption***

MaxiLub

MaxiLub is a complete system for lubricating sheet metal with emulsions, viscous liquids or oils that are difficult to spray. MaxiLub is used where variable lubricant quantities are required. It is perfectly suitable for viscous liquids and grease.

The standard version includes:

- Oil tank x 2
- Control system
- Lubrication unit for top or bottom.
- Floor stand

Pump unit

Options:

- Increased lubrication width
- Electrical oil heating
- Extractor fan with cyclone cleaner

Type	Min. blank size mm	Max. blank width mm
MaxiLub	200	800 ¹

¹ Up to max. 2,000 mm.
